BLESSING EHI OCHEME

Junior Software Developer | Frontend & Backend Development

Lagos, Nigeria | +234 916 037 0444 | ochemeblessingehi@gmail.com

Portfolio: www.blessingehiocheme.com | LinkedIn: linkedin.com/in/ocheme-blessing-ehi320b76321 | GitHub: github.com/Ehibliss

PROFESSIONAL SUMMARY

Detail-oriented Software Developer with project-based experience engineering responsive web applications and scalable APIs. Combines a structural background in Business Administration with technical training to build secure, user-focused digital solutions. Proven capability in translating complex business workflows into clean, modular, and reusable code across frontend and backend environments.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), React, Next.js, TypeScript, Responsive Design

Backend & Databases: Node.js, Express.js, PostgreSQL, MongoDB, RESTful API Design & Integration

Developer Tools & Design: Git, GitHub, Postman, Figma, UI/UX Principles

TECHNICAL PROJECTS

Fhast Pay - Banking Transaction Capstone Application | fhast-pay.vercel.app

- Co-engineered a full-stack financial application using React and Express.js to manage transactional data pipelines.
- Developed structured REST APIs and optimized frontend state management to deliver a secure, responsive user interface.
- Managed version control, feature branches, and deployment workflows using Git and GitHub within an agile team environment.

Bliss Magicfingers - Full-Stack Salon Booking Platform | bliss-magicfingers.vercel.app

- Architected a responsive web app incorporating dynamic appointment scheduling, duration tracking, and availability states.
- Designed a flexible database schema using MongoDB NoSQL principles to securely handle relational user booking structures.
- Connected user interfaces directly to server logic via custom endpoints, eliminating manual operational bottlenecks.

Personal Portfolio & Message Management Dashboard | www.blessingehiocheme.com

- Engineered a high-performance web portfolio using Next.js, leveraging server-side rendering to optimize asset load speeds.
- Integrated a secure contact data pipeline backed by a PostgreSQL database instance to safely parse external queries.
- Built a custom, restricted administrative dashboard interface to seamlessly view, sort, and manage incoming user messages.

HubSpot Client Interface Recreation | hubspotclone.netlify.app

- Recreated complex multi-tier SaaS layouts into modular, reusable React components to test and refine CSS layouts.
- Enforced pixel-perfect visual hierarchies and strict responsive breakpoints across mobile, tablet, and desktop viewports.

EDUCATION

B.Sc. Business Administration - National Open University of Nigeria (NOUN)

Timeline: October 2022 - Present (Expected Completion: April 2027) | Focus: Quantitative Methods, Statistics, MIS

CERTIFICATIONS

- Full-Stack Development Certificate - Udemy (March 2026)
- Front-End Development Certificate - Tech Sphere Academy (April 2026)
- UI/UX Design Certification - Africado Foundation (October 2024)
